1 The First Chapter

1. This is the first problem of the first chapter. This is a random sentence. This is another arbitrary sentence.

This is another paragraph, because why not.

- (i) A sub-problem can be added too. Everything works the same way here, just indented further.

All paragraphs after the first one within the problem, will be indented, which is the default setting for \LaTeX documents.

- (ii) Another subproblem.

- (iii) Another subproblem.

- (iv) Another subproblem.

2. The second problem in the first chapter.

- (i) The subproblem number starts anew in a new problem, as it should.

2 The Second Chapter

1. The problem number count automatically renews in a new chapter.
